BroadWorks Anywhere™

In today's business world, it's common for employees to work remotely and be reachable at multiple phone numbers, which can complicate communications. Customers might need to try multiple phone numbers to get in touch with the employee they are trying to reach. Meanwhile, employees might use several different phones (mobile, office and home office) to connect with customers. BroadWorks Anywhere simplifies, unifies, and streamlines communications for on-the-go and remote users.

BroadWorks Anywhere Overview
BroadWorks Anywhere extends your personal features to any number of fixed and mobile devices. BroadWorks Anywhere allows users to use one number for all incoming and outgoing calls, regardless of the phone used.

Benefits

- **Only one business number is needed.** Callers dial one number to reach the user's desk phone, cell phone and a soft phone simultaneously.
- **Universal features.** Users have access to all of their business features, regardless of which device they use to receive or make the call.
- **Works independently of the user's mobile network.** No relationship with the user's provider is required.
- **Move calls among devices.** Users enjoy voice call continuity by being able to move ongoing calls from one phone to another without hanging up.

Optional Add-ons: BroadWorks Anywhere works with all mobile phones, and for business and residential applications. Optional enhanced features include:

- **Unified messaging –**one mailbox for all (fixed and mobile) phones

- **Mobile Toolbar –** deliver handset control of Hosted VoIP features such as click to dial, extension dialing and access to corporate directories with the Mobile Toolbar client

- **The Toolbar –** provide Click to dial, call control, feature control and corporate directory management — all within Microsoft Outlook and web browsers

- **Communicator -** Comporium's audio/video softphone allows users to make and receive any calls from a laptop or PC at any location, any time.
